Course Information

The transition year is a one year preparation course to prepare you to study one of the government's new T Level courses. The course involves five components delivered over the academic year and is designed to prepare and develop you for one of the T Level courses for Digital Industries.

- There will be a guidance and assessment period where you will be provided with some clear career guidance and complete assessments to ensure a T Level programme for the Digital Industries is the best option for you for the future
- You will have the opportunity to complete a Level 2 qualification in English and develop your digital and maths skills throughout the course
- You will be taught introductory skills and concepts to prepare you to study T Level material in the future in some cases this may involve undertaking a relevant Level 2 qualification
- You will be able to develop employability skills, attitudes, confidence and behaviours to ensure you are ready for the T Level industrial placement to develop both skills and knowledge there will be a practical placement and therefore will also require a clear Disclosure and Barring Service check (DBS)

You will be taught study skills and reflective skills to ensure you can develop further and overcome barriers that may affect your education in the future.

Progression

This course provides you with the foundation to progress onto one of the T Level programmes in the Digital Industries.
