

## **GCSE Biology**

### **Study Type**

Part Time

### **Study Type Subcategory**

GCSE

### **Course Area**

Health & Science

### **Course Duration**

1 Year

### **Course Information**

If you want to explore the processes that take place in living organisms and gain a recognised qualification, then GCSE Biology is the learning opportunity for you.

As a student you will develop your experimental strategies and skills, your abilities in evaluation and analysis, and your scientific thinking.

You will also become knowledgeable about quantities, units and symbols, and expand your scientific thinking.

This will equip you with the knowledge and skills you need to achieve this qualification and apply what you have learned to new study and career-related endeavours.

### **Assessment**

Exams to be taken at the College
