

L3 Award in Paediatric First Aid

Study Type

Part Time

Course Area

Early Years & Education

Entry Requirements

The qualification is designed for people who have responsibility for children, whether at work in their setting or within a domestic environment, and aged 14+.

Course Information

This course has been developed to meet the standards for paediatric first aid and covers the relevant criteria referred to in the Early Years Foundation Stage Statutory Framework.

This course will provide you with the first aid skills you require when working in the children's workforce. Incidents and accidents with children can occur at any time and this qualification covers the type of situations that may occur and will give you the knowledge and understanding of how to deal with such situations in a safe and appropriate manner. You will develop an understanding of the more common illnesses that occur in children and explore how to deal with emergencies within early years settings in a professional manner.

Assessment

There are two units to complete this qualification which involve completing written tasks as well as taking part in first aid simulations and completing CPR on first aid mannikins.
